

CUT AN STEEL TOOL

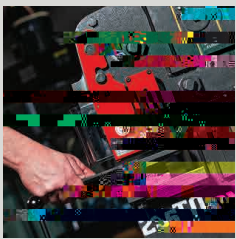

25 TON DUAL STATION

Utilize the 25 tons of power to add two additional workstations to your shop. Spend less time changing attachments and more time fabricating. This PowerLink hydraulic accessory features a standard punch assembly and an open tooling station. Customize the open station with a copier notcher, angle notcher, press break, rod shear, or multi-shear attachment.

You can operate the 25 Ton Dual Station with any CST Ironworker that has the factory installed PowerLink system or purchase a separate Portable Power Unit.
